PROFILE

I am a professional PHP Laravel developer focused on building reliable, high-performing web applications. With proven experience in back-end development, API integration, and database optimization, I consistently deliver clean, efficient, and maintainable code. I thrive in collaborative, fast-paced environments and bring a proactive approach to problem-solving and continuous improvement. I am committed to contributing to development teams with both technical expertise and a dedication to quality.

WORK EXPERIENCE

JFR GROUPS

2025 - PRESENT

PHP Laravel Developer

TowRunner- Towing Service Platform

- Developed Laravel backend for a towing platform, creating APIs and smart job assignment to connect customers with nearby providers and drivers efficiently and securely.

ArbeitTech - Home-Based Service Platform

- Built web and mobile APIs for ArbeitTech, an on-demand service platform for jobs like electricians and cleaners. Developed a system that sends job requests to subscribed fleets, who assign work to nearby providers. Integrated location tracking, job pricing, and payment processing via Stripe and other gateways, ensuring smooth operation across web and mobile apps.

360 Tech Solutions

2022 - 2023

PHP Laravel Developer

LMS - Learning Management System

- Developed a Learning Management System (LMS) for managing courses, users, and progress tracking. Built features for content delivery, quizzes, user roles, and real-time reporting, with a smooth, responsive UI and secure backend.

Installment Manager - Payment Scheduling System

- Built a system to manage customer payments in monthly installments. Users set the price and duration, and the system splits the total into equal payments. Admins can track and update payment status, simplifying the payment cycle management.

SmartPOS - Point of Sale System

- Developed a POS system to manage sales, inventory, customers, and daily transactions. The system supports product scanning, real-time stock updates, invoice generation, and user role management. Designed for speed and ease of use, making day-to-day retail operations smoother and more efficient.
